**National Seminar on “Sports Law in India: Issues & Challenges” & National Bill Analysis Competition 5<sup>th</sup> and 6<sup>th</sup> March 2018.**

### About the Seminar

Not only in India but globally, legal regulation of sporting world has become extremely necessary. Sports are played at national and international levels. General Assembly of United Nations has adopted resolution 58/5, which recognises sport and physical education as a means to promote education, health, development and peace. Sports also promote careers and entertainments leading to requirement of regularly measures.

Sports law is an amalgam of laws that apply to athletes and the sports they play. It is not a single legal topic with generally applicable principles. Sports law touches on a varieties of matter including contract, tort, trade mark, agency, antitrust, constitutional law, labour, sex discrimination, criminal and tax issues. There is a huge interest in sports, both on and off the field. The growing media coverage of highly paid athletics, advertising endorsement has let to various legal issues surrounding the sports industry. Sports law is a vital part to sports. There need to be a strong presence of good governance and someone to uphold the rules of game when they come into disrepute.

This National Seminar was organized as an endeavour towards focusing these gray areas related to sport and law. We hope its outcome will be in the interest and benefit of stakeholders such as sport persons, sports organisations, regulatory bodies, lawyers, numerous sport loving Indians and overall development of sports law jurisprudence.

#### Sub-themes

##### Dispute resolution in Sports in India

The nature of dispute in Sports is different and it needs a special approach to resolve amicably. Traditional courts are incapable to resolve sports disputes from that perspective, and more importantly they cannot decide the dispute in speedy manner. Resolving a dispute in a very short stipulated time is what expected from dispute resolution system. Variety of disputes can occurred in sports such as issues related to its governance, purely commercial, contractual, disciplinary, discrimination and few are even of a quasi-criminal nature. India needs to have a mechanism with well framed regulations to resolve sports dispute.

##### Present Regulatory Governance and issues

The current Indian model of sports governance has various stakeholders such as the Ministry of Youth Affairs and Sports, the Indian Olympic Association, the State Olympic Associations, the National Sports Federation and the Sports Authority of India with well defined roles. Sports Associations are not free from allegations of politics, miss governance, discrimination, corruption and so on. The issue of ‘governance’ needs to be studied on the backdrop of Supreme Court intervention and its decision of

appointing 'Committee of Administrators' (COA), which currently running the administration of the national cricket body.

### **Anti-doping measures**

'International Convention against Doping in Sport' in the year 2005 represents the first time that governments around the world have agreed to apply the force of international law to anti-doping. India ratified the said convention on 10th September, 2007. This is important because there are specific areas where only governments possess the means to take the fight against doping forward.

### **Legal Approach towards Sports in India**

In recent years, the State efforts are visible in the form of appointing committees such as Justice Mudgal Committee and draft Bills such as 'National Sports Development Bill, 2013', The National Sports Ethics Commission Bill, 2016, The National Sports University Bill, 2017 etc. Legal framework will provide crucial support in the overall development of sports in India. Considering the complexity involved, we must check the feasibility of having legislation, covering all the legal issues related to sports.

Warunjikar spoke on the various issues affecting the sports association such as politics, miss governance, discrimination, corruption and hence there is a need to have strong regulatory governance in the field of sports law. He also focused on Australian model and suggested to have similar mechanism in India.
